APU

AUXILLIARY POWER UNITS

Our Heavy Vehicle Auxiliary Power Units (APUs) are engineered for demanding defense applications, providing a versatile and reliable power solution tailored to your operational requirements. These self-contained diesel-electric generators are customisable, delivering between 25kW and 170kW of electrical power, depending on the engine size. Designed to perform in the most extreme conditions, our APUs ensure your vehicles remain fully operational during critical missions. Whether for low-power needs in smaller vehicles or high-output demands in larger systems, our APU solutions offer unmatched durability and adaptability for defense operations.

- ➔ Monoblock design with excellent water cooling
- ➔ Turbocharged, intercooled
- ➔ Mass balancing system for smooth operation
- ➔ Multifuel capable
- ➔ Operational temperature range*: from -46 °C to +49 °C

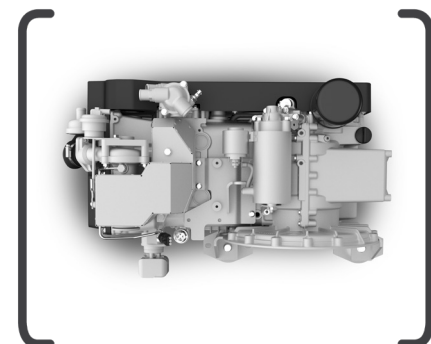

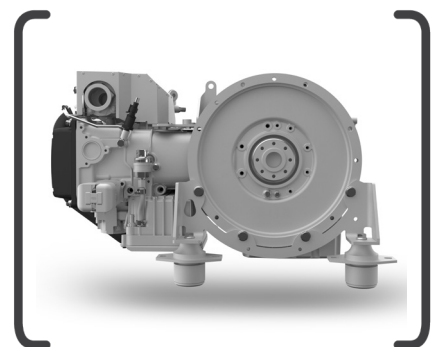

Overview

- Customisable Power Output
- Self-Contained System
- Seamless Integration
- Robust Performance
- Compact Design
- Defence-Grade Durability
- Flexible Compliance
- Comprehensive Documentation
